Item		Description
CUSTOM *- For Power HR teams*	**HR Information System**	Employees' information is perfectly synched with all HR functions. - Manage all employees' information and documents from one secure, central database.
	Employee Self-Service	"Allows employees to be able to make administrative requests such as leave, requisition, and more from any device. Empower your employees to engage HR without fuss; and with approval-controlled profile updates, you can give your employees the reins to update their information on the system, export payslips, recieve notifications, approve on the go and interact with modules subscribed to. Your employees do not need to wait on HR before completing tasks that they can do on their own, such as updating their information or requesting for leave, exit, whistle-blowing, confirmation verifications, surveys, self-appraisals etc. With our ESS module, HR can now focus on strategic organisational goals. "
	Approval Workflow	Approval workflows eliminate bottlenecks in your process, boost efficiency and improve workplace productivity. - Set up streamlined workflows for various requests - Set approvers, permissions and due dates. - Supports the inclusion of comments for both approvals and declines. - Provides the ability to set reminders and notification intervals.
	Advanced Reports & Analytics	"Reporting that connects all the moving parts of the HR process for better decision-making. - Create custom reports across subsidiaries. - Clone a report to other subsidiaries for which they have permission to create reports. - Share reports - Set up scheduled reports. - Customize and export various types of charts, including Bar, Pie, and Doughnut charts."
	Mobile Apps (iOS & Andriod)	Allows employees to access, update and interact with HR-related data and processes, such as employee profile data, Employee Leave application approval, Expense claims approval, appraisals, and more.
	Org. Structure	- Ability to define Departments, Division, Region, Job roles, Units, etc - Ability to map out organisation organogram
	Redeployment	Maximise your workforce to match organisational and employee needs. - Redeploy employees in bulk - Manage redeployment requests and history at a glance
	Leave Management	"HR can set up leaves depending on paygrades; can track and approve, decline, and manage leaves requests. - Empower your employees to view their leave balances, apply for leave, plan their leaves and also get it approved and view the status of their leave applications. - Admins can create leave policies that align with the company's objectives for rest and time off work. - Offers the functionality to add, reserve, and block leave days while also allowing for the configuration of public holidays based on specific regions. - Preview and bulk recalculate leave balances - Enables the export of leave analytics from the dashboard."
	Employee Onboarding & Confirmation	Onboard new hires with a customizable flow of events and activities designed to welcome new staff and help them get accustomed to their new role. - Accelerate the integration of new hires into their work environment with streamlined onboarding activities. - Integrate with our recruitment management system to sync new hire data. - Allow new hires to begin their onboarding and documentation remotely before they even step through the door. You can also assign a buddy to them. - Manage confirmation policies and verifications - Admins can send Confirmation letters right from the software - Automate the entirety of the confirmation process.

	Exit & Offboarding Management	Allows a smooth and professional offboarding process for exiting members of staff. - Create custom exit workflows reflecting your company policies. - Manage resignation requests, schedule and document exit interviews, surveys, handover notes and return of company assets. - Track employee offboarding process from start to finish. - Carry the necessary stakeholders along from IT and Finance to line managers and execs.
